The P R E F A C E.

A Book of this kind, when the scheme is well laid, duly executed, and the calculations may be depended upon needs no other recommendation than its own general and extensive use.

How far I have followed the principles before-mentioned in the composition of this piece, I must leave to the decision of those who have any occasion to make use of it; yet, to assure the Public, that it is perfectly correct, and may be safely depended upon, I have carefully re-examined every sheet as it came from the press, and signed my Name on the back of the Title of every Book, that will be warranted to be correct.

As nothing of the kind was ever before published, that could be warranted correct, so if this Book meets with the encouragement,

ment, but equal to the Author's care and endeavours to make it of general use, he will be sufficiently rewarded; The P

As to the Work, I have gone through it with so much plainness and perspicuity, and in such familiar and pertinent terms, that the meanest capacity may understand them, and apply them properly.

the author has less

and in this part I will say I will
endeavour to give in the composition of
such a description of the disease I
will pass by the occasion of writing this
to shew the Publick what it is believed
a common cold may be likely to bring
about, I have certainly no objection to
point as it comes from the best
man in the place of the Time of every
Book, that will be necessary to be copied.

As it is said to be very well worth
supplied by such country places with the necessary
books.

A EXPLAN.

and says & Gittins, with the Money that Com-

es to him, in or out of his Hand, in this Manner,

EXPLANATION.

AS no Brewer ever sends out a single Butt
of Beer ready Milled, upon Ullage,
under one hundred Gallons, so I thought it un-
necessary to begin this Table at less, though in
case it should so happen, that a Butt should be
sent upon Gauge, under one hundred Gal-
lons, only refer to the Return Table, and you
will find any Quantity of Gallons, from one
Gallon regularly, Gallon by Gallon, up to one
hundred Gallons, with the Prices fixed to each
Quantity as in all the other Tables. The first
column on the Left Hand is the Quantity of
Gallons contained in all the Butts sent in, as
for instance, suppose you have six Butts of Beer
gauged to 633 Gallons, refer to the Index
for the Table for six Butts, and look down the
first Column on the Left Hand, until you come
to 633, and in the same Line you will find the
Quantity of Barrels, Firkins, and Gallons, 633
Gallons amounts to, which is 17 Barrels, 2 Fir-
kins and 3 Gallons, A 3

kins, and 3 Gallons, with the Money that Quantity of Beer comes to in the same Line, which is 25*l.* 9*s.* 1*d.* and so in like Manner, any other Quantity with the Prices fixed to each Article.

As there is four different Tables for the different Prices, and different Casks used by the Brewers and sent to the Victuallers, so I began the first Table from one Butt upon Ullage, regularly, to 24 Butts full of Store-house Beer at 29*s.* per Barrel, which is as much as any Victualler has laid in at any one Time. The second Table is calculated for Returns at the same Price of 29*s.* per Barrel, from one Gallon regularly up to one hundred, Gallon by Gallon, and then to 200, 300, and so on to 2000 Gallons; and by one thousand Gallons you may easily find out what Number of Barrels, Firkins, &c. will contain twenty thousand Gallons, and the Money any Quantity of the above amounts to.

The third Table is calculated for Started Beer at 28*s.* per Barrel, from one Firkin to one hundred

hundred Barrels regularly, Barrel by Barrel, and
 up to 900 Barrels, 300 Barrels, and so on to
 one thousand Barrels, which is as much as any
 Victualler ever Starts in any one Season, with
 the Money each Quantity amounts to. The
 reason of my Beginning this Table at a Firkin,
 is, a Misfortune may happen of a Barrel turning
 in the Dray, and loose perhaps a Firkin or Kil-
 lerkin, which might create a Dispute between
 the Brewer and Victualler; which, if this Book
 is properly attended to, and as it is apprehend-
 ed no Victualler will be without one of them,
 Business will be carried on to the Satisfaction of
 all Parties.

The fourth Table is calculated for Puncheons of Storehouse Beer at 29s. per Barrel, from
 one Puncheon full to one hundred Puncheons
 full, which Quantity no Victualler ever exceeds,
 having in his Custody at one Time, who is ob-
 liged to draw their Beer in Puncheons; and in
 Case of Village Puncheons being sent to any
 Victualler refer to the Butt and Return Table.
 For Instance, suppose a Victualler has 4 Pun-
 cheons sent in upon Ullage, which is one Dray
 Load,

Lord; each Puncheon (gauge'd at 69 Gallons)
four Times 69 Gallons is 276 Gallons, refo
rd the 2 Butts full,
Which is 216 Gallons comes to £M 9
Then refer to the Return Table to doles
gallons for 60 Gallons comes to £ 1 18 14
Which makes 276 comes to £ 1 2 4

To prove the above to be true and
correct, if Puncheons full, is 2 Butt, which
contains 288 Gallons, and a
mounts to £ 1 12. by subtracting

276 Gallons from 288, shews the
Quantity deficient 26.

Add that to the Money which is paid
for 276 Gallons full, brings it up to £ 1 18 14
-do Money for 2 Butt Puncheons full, £ 1 12
Which makes £ 1 12 4
and so forth in any other Quantity.
